

KENTON COUNTY FISCAL COURT
VIRTUAL MEETING
<http://www.tbnk.org/togo2>

1840 Simon Kenton Way
Covington, KY 41011

MEETING MINUTES
April 28 , 2020
5:30 P.M.

Call to Order

Judge/Executive Knochelmann called to order the April 28, 2020, special meeting of the Kenton County Fiscal Court. Treasurer Roy Cox led the invocation and the Pledge of Allegiance.

Present: Judge/Executive, Kris Knochelmann
Commissioner Beth Sewell, District 1
Commissioner Jon Draud, District 2
Commissioner Joe Nienaber, District 3
County Attorney Stacy Tapke

Staff: Joe Shriver, County Administrator
Scott Gunning, Assistant County Administrator
Sue Kaiser, Fiscal Court Clerk
Roy Cox, County Treasurer

Approval of Minutes

A. Approval of the Minutes from the meeting of April 14 , 2020.

Commissioner Nienaber made the motion for approval; seconded by Commissioner Sewell. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

Citizens Address

No citizens sent any questions to the Fiscal Court.

General Business

A. Claims List - Dated April 24 , 2020.

There were no questions on the Claims List.

B. Discussion regarding the Administration Building.

1. Request to approve the Contractor 's Application for Payment #31.

County Administrator Joe Shriver stated that the pay app has been reviewed and approved. It is for \$231,000, and there is still \$400,000 in retainage. We believe that after settling up, there will still be some funds that come back to us.

Commissioner Draud asked if the warranty is for one year?

Mr. Shriver answered that it depends on the parts. Some of the warranties run beyond a year.

Commissioner Draud asked if the contractor's warranty is for one year?

Judge Knochelmann answered that this is correct.

Commissioner Draud asked when the final financial aspect of the project will be settled?

Judge Knochelmann answered that his opinion is that the final financial aspect could be late summer or into the winter time. We are in no rush.

Commissioner Draud made the motion for approval; seconded by Commissioner Sewell. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

Resolutions

A. Resolution No. 20-01H

A Resolution for the Kenton County Fiscal Court concerning Fiscal Year 2019-2020 Budget Adjustments.

Treasurer Roy Cox stated that the budget adjustments are for the following:

\$1,100 for animal food for the Police Department, \$550 for Police towing services, \$18,700 for communications, \$55,000 for food prep at the Detention Center, and then we are putting in funding line items to accumulate for reimbursable expenses for emergency protective measures related to COVID 19. So, we are putting \$50,000 in the General Fund, \$10,000 in the Road Fund, \$10,000 in the Jail Fund and \$10,000 in the Dispatch Fund.

Commissioner Draud asked what the \$55,000 is for the Jail?

Mr. Cox answered that that is to move money from Jail Personnel into the food prep service, because they are running out of money in the food line. This is an estimate to take them until the end of the Fiscal Year.

Commissioner Nienaber stated that in the lines where we are funding the COVID19 expenses, he assumes that is to give us some liquidity in those accounts in the event that we need them or is that money that has already been spent?

Mr. Cox answered that this is money we can use if we need it. He is not allowed to spend money unless we have it budgeted in there, so if we do have expenses we have a place to put them and we can pay for them then.

Commissioner Draud asked if Mr. Cox will be able to document everything for possible reimbursement?

Mr. Cox answered that yes, they are documented everything just like they do the grants.

Commissioner Sewell stated that the jail food expenses are a little questionable, because right now they have less people to feed. Did Terry Carl explain why we are incurring more costs for this?

Mr. Shriver answered that before COVID19 we had record populations, so it is not because of our current population. It is because of that higher population before all of this.

Commissioner Nienaber made the motion for approval; seconded by Commissioner Sewell. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

Consent Agenda

- A. Exhibit No. 20-56**
Request approval to ratify the Memorandum of Understanding for Kenton County to utilize the Northern Kentucky University campus space for housing and quarantining of Kenton County Emergency Service Personnel.
- B. Exhibit No. 20-57**
Request approval to apply for a \$58,000 grant from the Bureau of Justice Assistance, which will be used to purchase up to five electrostatic disinfectant machines to be shared amongst the Kenton County Police Department, Kenton County Detention Center and the Kenton County Sheriff 's Office to help prevent the contamination and spread of COVID-19.
- C. Exhibit No. 20-58**
Request to accept bid from DWA Recreation/GameTime to purchase playground Equipment and Safety Surfacing at Middleton-Mills Road Park.
- D. Exhibit No. 20-59**
Request to accept bid from DWA Recreation/GameTime to purchase playground Equipment at Richardson Road Park.
- E. Exhibit No. 20-60**
Request approval to award the contract for Electronic Monitoring Services to Securus Technologies, a Satellite Tracking of People, LLC Company for the Kenton County Detention Center.

Commissioner Draud asked what the \$58,000 grant is about?

Mr. Shriver answered that it is a grant that Chief Jones found for the Sheriff's Department, Detention Center and Police Department to secure funds in response to COVID19.

Judge Knochelmann stated the disinfectant machines would be to essentially spray down cruisers and areas that may have been infected.

All items on the Consent Agenda were voted on together.

Commissioner Draud made the motion for approval; seconded by Commissioner Nienaber. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

Executive Orders

- A. Executive Order 20-23**
An Executive Order relating to the Fiscal Court approving the step increase for Anadia Rockey as a Dispatcher I for the Kenton County Emergency Communications Department.

Commissioner Sewell made the motion for approval; seconded by Commissioner Nienaber. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

B. Executive Order 20-24
An Executive Order relating to the Fiscal Court approving the Position change of Joe Richardson from Seasonal Laborer to Seasonal Trustee for the Kenton County Parks Department.

Commissioner Nienaber asked what the difference is between a laborer and a trustee?

Assistant County Administrator Scott Gunning answered that the trustee works on the weekend, and the laborer works throughout the week.

Commissioner Nienaber made the motion for approval; seconded by Commissioner Draud. Judge Executive Knochelmann called for a roll call vote with the results being Commissioner Draud, yes, Commissioner Nienaber, yes, Commissioner Sewell, yes and Judge Knochelmann, yes. The motion passed with a vote of 4-0.

Administrative Reporting

Detention Center

Marc Fields stated that the population had hit about 870 at the end of last year, and that was much more than they planned for so this budget adjustment will get them through that. Their food costs in the last two months have been reduced by about \$5,000 a week. The population being down has really helped them. They started out on March 1st with a population of 746, and as of 3:00 p.m. today it was 345, which is down 53%. Food cost and overtime has gone down. Less people are calling off work too. It is good to note that their overtime is low, and their staffing

Commissioner Draud asked if the food costs will balance out at the end of the year since they only have about half the people?

Mr. Fields answered that it will not. They did an analysis, and they had spent so much of the budgeted money at the end of last year that it put them way over. It is about 270 people that they didn't plan for.

Commissioner Draud asked if they are anticipating saving some money now?

Mr. Fields answered that they do, and they figured that in with the \$55,000 adjustment.

Terry Carl then stated that when the virus started, they had nine inmates that they isolated that either had temperatures when they came into the jail or they knew someone that had the virus that they had come in contact with. They isolated them, tested them and everyone came up negative. They also had three employees that called off with what they said was the flu, but they are not sure if they had the flu or COVID19 so they were quarantined for the 14 days because they weren't tested. They are all back, and are healthy. They have been very fortunate, and they continue to take precautionary measures. He then thanked Steve Hensley and his team for getting them all of the protective equipment.

Commissioner Nienaber stated that it is interesting to see that we have gotten the population down so low, and he knows that Transitions took some of them in. Will there be lessons to be

learned from this on an incarceration standpoint? Are there people in the jails that might not need to be?

Mr. Carl answered that right now they are thinking the same thing. They are collecting data, and will hopefully be passing that onto the Judges. Right now they have 110 on home incarceration, and the Judges have been really helpful. Plus, the Department of Corrections is letting out a tremendous amount of inmates.

Commissioner Nienaber stated that it will be interesting to see the correlation in the crime rate after you let 50% of the population of inmates out of jail. That will be the lagging indicator.

County Attorney Stacy Tapke stated that she thinks we will find on the Prosecutor and Judge's side that this will be looked at and discussed for legislation in the future. You get a lot of people that don't show up for court hearings, and you get bench warrants for them. There have been a lot of orders preventing those individuals from going to jail, and just citing them. That may be where you see some of that focus and attention as we get down the road. She has seen some articles that show overdoses have increased in our community, and this may possibly be a consequence of releasing inmates that are addicted to drugs.

Judge Knochelmann stated that there will be learning opportunities across the board. Everybody seems to be coordinating to get that population down.

Emergency Management

Judge Knochelmann stated that Steve Hensley has been our point person during the pandemic. He has been working with the cities, hospitals and anyone that touches this. He has had many late nights and weekends, while still managing accidents and chemical spills.

Steve Hensley thanked his team for all of their efforts. He couldn't do this without them. Todd Schulkers, Ron Becker and Dave Jansing have been putting in the same amount of hours as he has, and he truly appreciates their help.

Mr. Hensley then stated that since the original Emergency Declaration, they have been working with the cities, and a majority of them have also declared emergencies. They have been getting their requests for assistance to the state. They must fill out the paperwork to get reimbursed. We have spent some money for additional PPE that is hard to get a hold of. We have been trying to get a stockpile of PPE for the first responders in case the supply chain slows down, or happens to dry up. They receive daily updates from the Health Department on COVID19, and the update today wasn't a positive one. We are up 15 additional cases, and have had four more deaths as of today. It is still very active. The dispatch protocols that were put into place by Dan Mathew and his team remain in place to protect his team and first responders. They appreciate all that dispatch is doing for them.

Mr. Hensley then stated that they assisted in setting up the Convention Center for the homeless folks, and they have since been relocated to hotels in areas of Northern Kentucky to keep them isolated and to give them room for social distancing. They have worked with neighboring counties to find areas where first responders can go if they have been exposed, or don't want to expose their families. NKU has made areas available as well, and he thanked them for the help. No one has had to use the facility yet though. In addition, they are participating along with the Judge on a regional call with the Health Department. It has been very beneficial to connect with Dr. Saddler and her team. They also participate in calls with the three EMA agencies in the region. They are sharing resources, and pulling PPE from the same locations. They have several state level conference calls, and weekly calls with the Mayors.

Mr. Hensley then stated that they participated in the drive thru testing at Summitview Academy on April 15-18. They tested 840 county residents in the drive thru testing. They also pushed out about 100,000 PPE items, which included 87,000 masks, 27,860 pair of gloves, many gallons of hand sanitizer, shoe covers, face shield and gowns. Any of the expenses associated with these purchases fall under emergency protective measures for COVID19. We should be able to submit these expenses for reimbursement from the government.

Mr. Hensley then stated that outside of the COVID19, they are still continuing their day to day operations. There have been several commercial vehicle accidents on the I-75 corridor. Also, he knows that the Judge worked long and hard with the Fire Districts in the south end of the county, and Piner Fire District is now activating their Advanced Life Support ambulance.

Commissioner Sewell thanked Mr. Hensley for the time he has given her to bring her up to speed on everything. They, as Fiscal Court members, feel detached but it is good to know that he is just a phone call away. She spends as little time on Facebook as possible, but she does see people's concern. One of the concerns is that they didn't know that the testing was happening in our community. She knows that it was for limited people, but she responded. She encourages them to have whoever was pushing out the information to push it out again. She hopes it will circle back to Kenton County. She would also like the burn ban explained.

Mr. Hensley explained that the burn ban is not put in place by us. We do this to parallel the non-attainment air quality through the Division of Air Quality. They mandate this as we are a non-attainment air quality county. So, each year through this same period they activate the burn ban, and basically this give local fire departments and jurisdictions to provide enforcement efforts if necessary if someone is burning in violation of the order. It is not necessarily put in place as it relates to drought conditions, it is for air quality conditions. Again, it is mandated federally each year during this period of time until somebody revisits it and changes the law.

Commissioner Sewell stated that we need to stress that it is local jurisdictions that need to make the call on how we respond to it.

Judge Knochelmann stated that if someone wants to have a fire pit, he doesn't think anyone will bother them.

Mr. Hensley stated that this is for the people that decide that they want to burn construction or other debris, or burn off two acres at a time or something. He then stated that the COVID19 drive thru testing was set up by the state in partnership with Kroger. You had to go through the online portal to get an appointment, and part of the frustration was that every appointment by the end of the first day had filled up and they were at capacity. They even made some exceptions, and added some tests to get people in. It was a very quick moving process in that they advertised it very briefly, and they must have hit their target audience because the way they are doing drive thru testing now is that basically you don't have to be symptomatic in some areas. We had very specific categories in our testing, in that you had to be 65 or older and have pre-existing health conditions, or a medical provider or first responder to get tested. They were rolling this out as a soft rollout. We were only the second county in the Commonwealth to receive this, as they knew Kenton County had a need with our population base. They were proven to be correct about that. It was a pretty fluid process that worked pretty well. What we are being told is that after they complete other areas of the Commonwealth they may revisit Kenton County. If that in fact happens, we will try to push it out well in advance. For the first rollout, we were very limited on the time. He and the Judge were alerted on a Saturday afternoon, a site visit was done on Monday and they were up and operational midweek.

Commissioner Draud stated that Mr. Hensley should probably tell the number that tested positive.

Mr. Hensley stated that it was actually an amazingly low number. Among the 840 tested, the number of positive cases was in the low twenties. That number went up a little bit, because there were some delays in getting some of those responses back. One of the discussions that they have had with the Health Department and other places is that based on where were offering the testing, we were kind of outside the downtown corridor, where maybe some of the population that could have benefitted from this testing may not have been able to get transportation out there for the testing. The Judge has been discussing that issue with some of the corporate citizens that may be willing to offer some assistance with that issue.

Commissioner Nienaber thanked Mr. Hensley, Joe Shriver, the Judge and everyone that is on this on a daily basis. He then stated that he has some concern over the metrics. He knows that we don't control this, but as testing becomes more readily available it is going to become harder to achieve a goal of 14 consecutive days of decreasing cases. He is not sure he likes that metric. He guarantees that he is around people that are non-symptomatic, and if they did the antibodies testing he would be interested to see how many people actually had it. The number can only go up each day as the testing increases. It will be even more if we are testing non-symptomatic people. What kind of time window do you have as you increase testing? He just wants life to get back to normal, and wants a vaccine. The original premise of all of this was so that we didn't overload the hospitals. We are going to have more numbers, because we are going to have more testing. There will be people that have had it that will have had no difference in their normal routine. The rest of the metrics are more important than the number of positive tests. These are the conversations that he is having with people every day.

Mr. Hensley stated that most of what Commissioner Nienaber just mentioned has been discussed. During the daily conference calls with the Health Department, some of the Judges have expressed some of the same viewpoints and Dr. Saddler has been communicating this at a State level. He thinks that these processes are being evaluated, and continuously monitored. It seems like one day they are given a directive and policy, and two days later it is modified or changed. He anticipates that this will be evaluated throughout.

Judge stated that there was a call with the Governor's Cabinet Secretaries, and he brought that question up. They said that they are considering it, but they have other parameters that they are trying to work on.

Commissioner Draud congratulated Steve Hensley on getting the ambulance service at the south end of the county.

Mr. Hensley stated that this was a collective effort that involved many people. The result is enhanced services for the south end of the county. The Chief at Piner, and the other Chiefs out there that worked together are the true heroes.

Commissioner Nienaber stated that he is getting very frustrated with the tractor trailer accidents on I-75 around Ft. Mitchell. Every time it clouds up, he sees a police cruiser there with its lights shining and that is costing money. There has to be a real discussion about what can be done. It would be one thing if it was just cars running into the wall, but it is giant tractor trailers. He is very upset about how much taxpayer money and liability is going into this problem. Every time it happens, it is closer to them going through the wall and killing multiple people. We need to reroute these trucks or something.

Mr. Hensley stated that he shares in the fears and frustration. He knows that there are some things behind the scenes

Commissioner Nienaber said that back in the 80's, there was an extraordinary number of accidents at the cut in the hill. Traffic was rerouted until they got what they thought was a safe solution.

Mr. Hensley stated that this is correct.

Judge Knochelmann stated that the court could send a letter to have the situation evaluated. There was a bid received for the permanent repair of the wall, and this should be approved in the next couple of days. Jude Hehman, the Mayor of Ft. Mitchell has been on top of this situation. Not only are Ft. Mitchell Police out there, but Steve Hensley and his team, Ft. Wright Police and Villa Hills are out there as well and that is dangerous. The new wall could also be fast tracked as an emergency, to get it done quicker.

Commissioner Nienaber stated that they also need to find out what is causing them to run into the wall. It is like painting over graffiti fixing that wall.

Judge Knochelmann stated that supposedly every one of those studies shows that people are flying through there, and are coming from every lane. They did the grinding of the pavement, which was supposed to slow people down. This may have saved people that we don't know about, but there have been four or five wrecks in the last few days.

Commissioner Nienaber stated that these 80,000 pound trucks start at the bottom of the hill at the bridge, and they get up next to another truck that is struggling to get up the hill. They then violate the "stay in your lane" signs, and there are trucks three lanes wide violating the signs. Then the signs go away around Ft. Wright, so maybe the lane restrictions need to continue through the curve in Ft. Mitchell. He doesn't know how they get their speed up. They are definitely violating the lane restrictions. He thinks the state should continue the lane restrictions though the turn in Ft. Mitchell.

Judge Knochelmann stated that he thinks that is a good idea. He knows there is additional signage, and he will be sending a letter to the State Police asking them to assist as well.

Emergency Communications

Dan Mathew stated that he has some numbers to report, and some positive news about the radio system. He started with the numbers, and why they are important to him. They are keeping weekly numbers at the Dispatch Center, because it determines how they staff as they balance the operations in the field, and keep people safe there. The numbers are dramatically down, particularly when you look at the period this year between March 1st and the present. They are remarkably down from that same time period in 2019. The only numbers that are up are the inbound and administrative calls. The Police and Fire incidents are way down, they are the lowest in a one week period than any other one week period in 2020. That is good news, and it appears that people are staying home. Overtime, paid time off and sick time is down in the call center. They luckily haven't had any of the Dispatchers test positive for COVID19, and everyone is coming to work. They are a great team, and he appreciates everything that they have done.

Mr. Mathew then stated that he has positive news about the radio system. A third party just completed a lengthy, three week driving test of the radio system. This test covered Boone, Kenton and Campbell's areas. The county was divided up into one square mile tiles, and they tested 2,835 of those tiles that were drivable, and of those tiles we have a 99.8% pass rate. This means that the radio system far exceeds the expectation that was put in the RFP by the county, and what Motorola agreed to. The next steps will be to start the in building testing, so once the quarantine is lifted they will start getting people into buildings to check the signals. Hopefully, they will be up and operational by the end of the summer.

Mr. Mathew then thanked his team, as he knows it is challenging. They have gotten a great response to getting the resources that they have needed. The different departments, from IT,

Emergency Management to Building Maintenance, everyone has been so helpful. Also, all the kind words, thoughts and prayers for his family are greatly appreciated as well.

Judge Knochelmann thanked Mr. Mathew and his team.

County Attorney 's Report

County Attorney Stacy Tapke had nothing to report.

Commissioners ' Reports

Commissioner Jon Draud

Commissioner Draud asked what is going on with the Welcome House, the Emergency Shelter and Boone County?

Judge Knochelmann answered that Boone County and the City of Florence have been working on housing the homeless during the COVID19 crisis in a hotel. There was a little bit of an issue with Cincinnati bringing homeless into Florence, but they were moved back to Cincinnati. Boone County partnered with the City of Florence to house the homeless in partnership with Welcome House and the Emergency Shelter of Northern Kentucky. This is not a long term fix, but it is fantastic first step. This is to help keep this population safe from being out picking up the virus and spreading it.

Commissioner Sewell asked if they are picking up people and bringing them to the location?

Judge Knochelmann answered that those 30-35 people are there full time. There are those that do work, and they are being transported. The locations that have been chosen to house them are places where they can't just get out and walk. The individuals have activities and food provided. PeeWees has been one of the restaurants that has been contracted to provide the food, and there have been a lot of donations for both sites. They are not taking them to the location, and then taking them back.

Commissioner Sewell stated that the reason she is asking is that people that like to bike have seen groups gathering at the Licking River, and she doesn't know what the plans are about this. The police can't really move them on, because the Homeless Shelter isn't being occupied at this time. As people are out biking, it is concerning. She is wondering if they are okay, and it is an issue.

Judge Knochelmann stated that there are several locations he goes by every day, and there seems to be more people hanging out that weren't there before. He thinks that some of the individuals are a result of the jail releasing some inmates. He believes that there is not quite an impact of people losing their homes, because the courts aren't processing evictions and such. He thinks that when the courts open back up, and the economy doesn't get some of those individuals back to work there will be an impact. The jails in Kenton, Boone, Campbell and Cincinnati have reduced their populations, and some of those individuals have nowhere to go. There will be ripple effects of this. The outreach people from Welcome House and ESNKY have been checking on a lot of individuals, and trying to either invite them to come to a hotel. There is still drug use there, and the overdoses have seemed to spike. It is an ongoing challenge.

Commissioner Beth Sewell

Commissioner Sewell asked if Judge Knochelmann will be asking Chief Jones to address the Fiscal Court on crime, and what is happening with victims? She has been hearing that officers are caught in the middle, and it would be interesting to how they are reacting since the courts are not open. It is interesting to hear that 911 calls are down, but then we are hearing that

overdoses are up and there are a lot of unanswered questions. Also, she is curious to hear what is going on with the Animal Shelter.

Judge Knochelmann answered that he wants to make sure that the departments continue to report to the Fiscal Court.

Commissioner Joe Nienaber

Commissioner Nienaber stated that they are 2/3 of the way through the interviews for a new PDS Director. He believes that a choice will be made by the end of this week. The good news about our organization, our area and our county is that we attract a lot of highly qualified talent. He appreciates everyone who put their name in the ring.

Judge Knochelmann thanked Commissioner Nienaber and Commissioner Sewell for their selflessness in doing the right thing for PDS and the community.

Commissioner Nienaber then thanked Commissioner Sewell, as she was previously a member of the board, and when they did the changeover she volunteered to step down. Her time was well served, and she is a class act.

Judge/Executive 's Report

Judge Knochelmann stated that there has been regional discussion about how to open back up. We don't get a special call about what is being reported in Frankfort at 5:00. He, along with Steve Hensley and Joe Shriver work to keep everyone in the loop. The regional restart effort has had some discussion on the Cincinnati side of the river, as all size businesses are having the same questions about the unknown. How do you get businesses open safely to get the economy going? Those are the conversations we have been having here as well. What are the metrics, and how are they being tracked? P & G is committing to giving one to two million masks to businesses opening up on both sides of the river. There is also talk about how you support all the business, whether large or small. Today they had a conversation talking about how to make a recommendation to the Governor about parameters for small business, restaurants, etc. It is very clear that the Governor is going to make his call, and he will take all the necessary advice into play but we are trying to get the word sent from different segments of the community to Frankfort. The industries should be the ones to say how they operate, because they know their operations the best, and they can make recommendations. The discussion was with the health department, and there were home builders, the restaurant association, the Chamber and more. Everybody is working on the same thing, how to get open safely without infringing on people's rights.

Judge Knochelmann then stated there continues to be a weekly call with the Mayors, and Dr. Saddler is on that call as well. This call is to answer questions, and connect with the needs of the First Responders. They are making sure to facilitate information as quickly as possible for the group. Also, one bit of data that was very telling is that people that need to go to the hospital for health issue other than the virus are not going. The reality is that people need to go if they have an emergency.

Adjournment

Having completed all business before the Court, Commissioner Draud offered a motion to adjourn which was seconded by Commissioner Sewell. Judge Knochelmann requested a voice vote whereupon all members present voted in the affirmative with a 4-0 vote.

Text for all proposed and recently passed ordinances may be acquired by accessing the Fiscal Court web page at <http://www.kentoncounty.org> or by contacting the administrative offices at 859.392.1400.

CLERK CERTIFICATION

I, Sue J. Kaiser, having been appointed to the office of Fiscal Court Clerk, do hereby certify that this is a true and accurate record of the actions taken by the Kenton County Fiscal Court at the meeting of April 28, 2020.

Sue J. Kaiser
Fiscal Court Clerk
